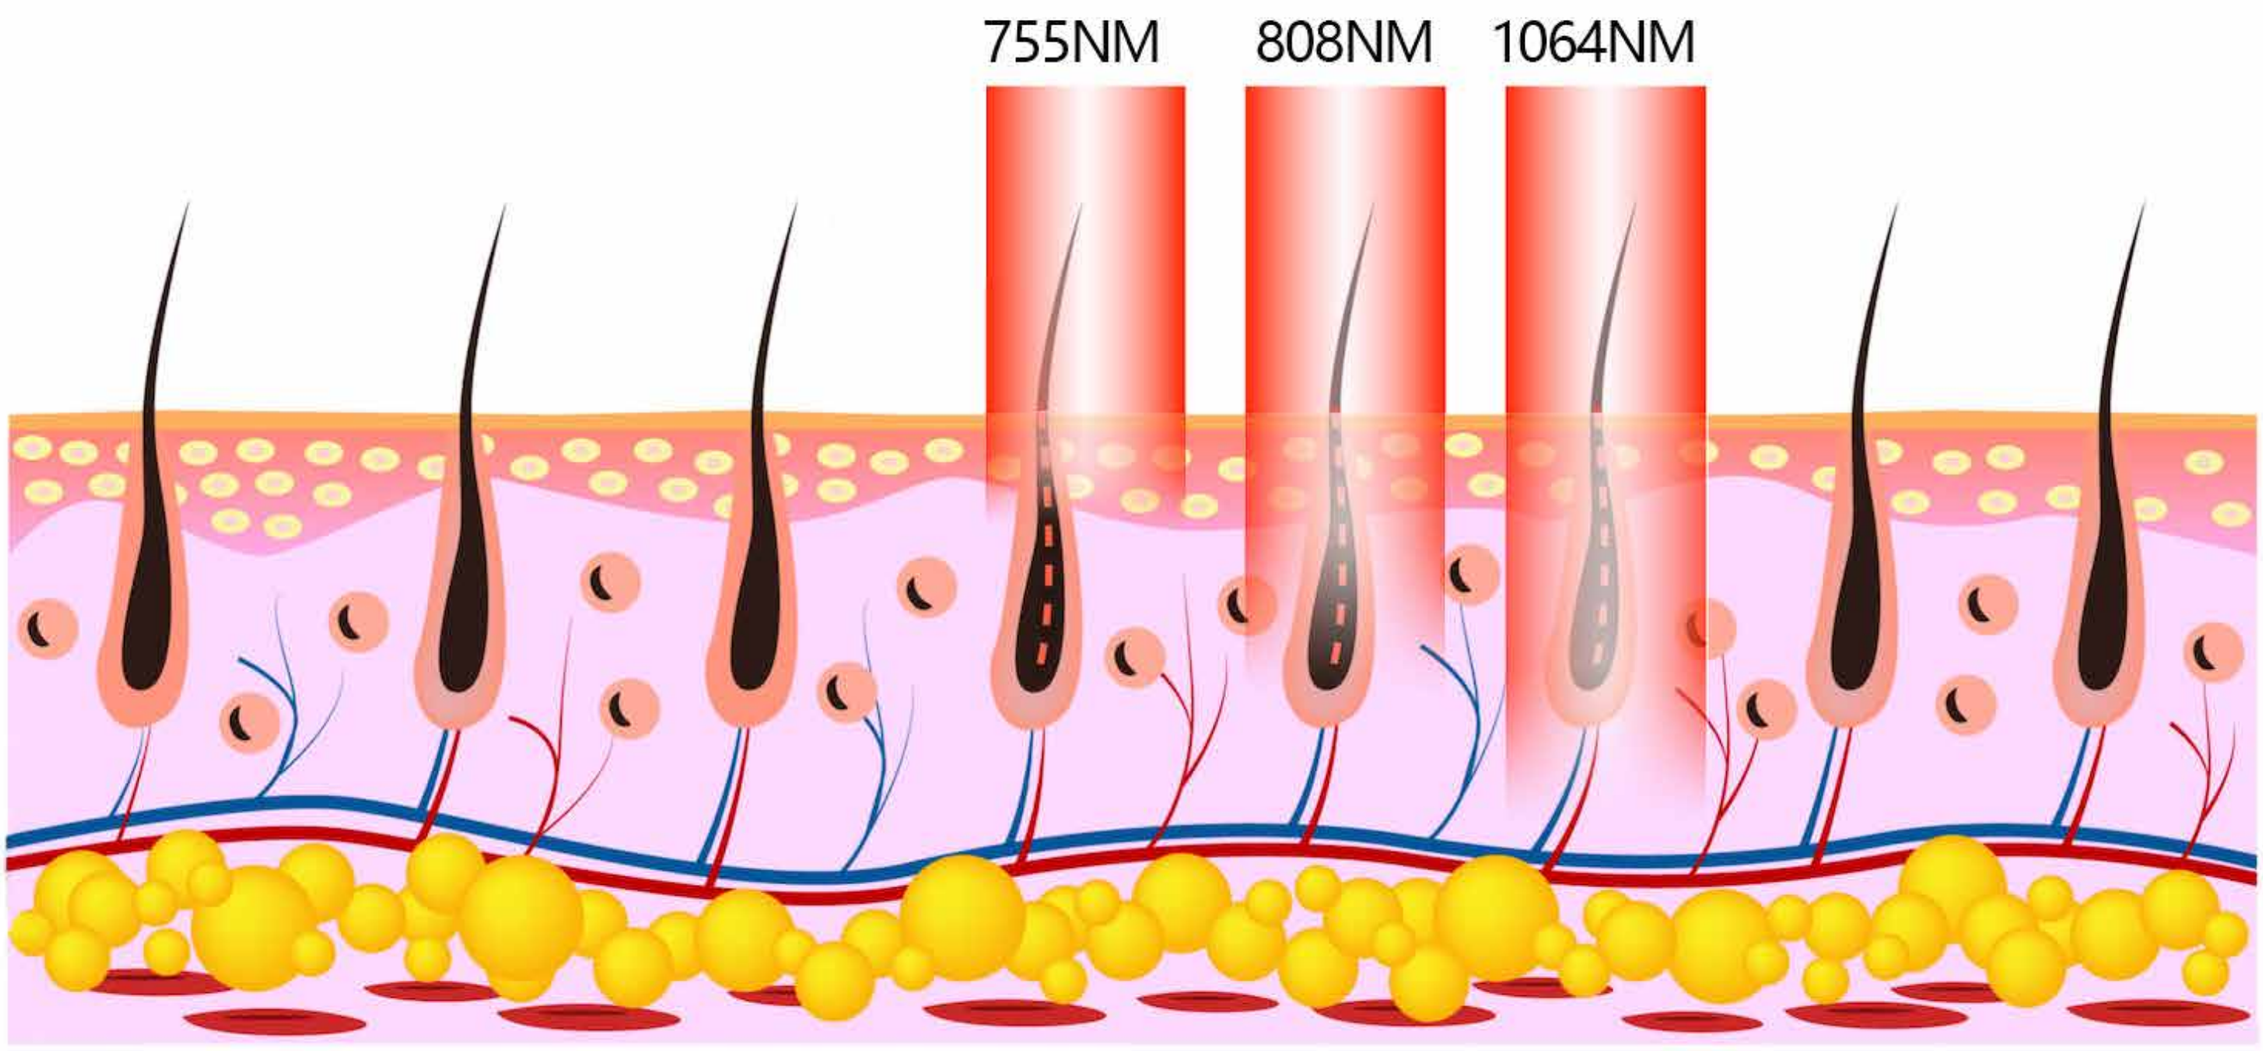
Theory

How does the diode laser works ?

During the treatment, laser penetrating into the skin is absorbed by the melanin in the hair follicle, leading the hair follicle temperature raising and stopping to generate of melanin, resulting in a permanent hair removal finally.



Three walengths can penetrate different depths of the skin, working on different depth of hair follicle, making the treatment more effective.

DIFFERENT SKIN COLOR TYPE IS AVAILABLE

TYPE I	TYPE II	TYPE III	TYPE IV	TYPE V	TYPE VI
Light, pale white	White, fair	Medium, white to olive	Olive, moderate brown	Brown, dark brown	Black, very dark brown to black
